

## CONTENTS

<i>PREFACE</i>	3
<i>I. BASIC MECHANISMS</i>	
GOLDBERG, J.M. The role of voltage-gated hair-cell currents in vestibular transduction	5
HIGHSTEIN, S.M., RABBITT, R. AND BOYLE, R. Determinants of the response dynamics of the vestibular semicircular canals in the toadfish, <i>Opsanus tau</i>	5
PETERSON, B. AND SLATER, N.T. Dynamic properties of NMDA receptors: A potentially important factor in vestibular signaling	6
STRAKA, H. AND DIERINGER, N. First steps in central vestibular information processing	7
DUTIA, M.B. Cellular mechanisms of vestibular compensation	8
VIDAL, P.P., VIBERT, N., BABALIAN, A., BANTIKIAN, A., SERAFIN, M. AND MÜHLETHALER, M. Vestibular plasticity: A study in the <i>in vitro</i> whole brain preparation of adult guinea pig	9
LACOUR, M., GUSTAVE, S., DUFLO, D. AND GESTREAU, C. Fos expression in the rat brain after exposure to gravito-inertial force changes	10
UCHINO, Y., SATO, H., IMAGAWA, M., KUSHIRO, K., ZAKIR, M. AND ISU, N. Canal and otolith inputs to single vestibular neurons in cats	11
SCHOR, R. H. Spatio-temporal convergence responses in vestibular nuclear neurons	12
CHAN, Y.S. AND LAI, C.H. Postnatal development of the spatial coding capacity of otolith neurons: Physiological properties and c-fos expression	13
GLASAUER, S., DIETERICH, M. AND BRANDT, T. A 3-D model of otolith-ocular brainstem connections: The effect of peripheral and brain stem lesions	14
BÜTTNER-ENNEVER, J.A., HORN, A.K.E., SCHERBERGER, H., HENN, V. AND D'ASCANIO, P. The location of motoneurons innervating slow and fast extraocular eye muscle fibres in monkey	14
SIEBOLD, C., GLONTI, L., KLEINE, J., GLASAUER, S. AND BÜTTNER, U. Three-dimensional vestibular signal processing in the rostral fastigial nucleus	15

CULLEN, K.E. AND ROY, J.E. Modulation of vestibular neuron activity: Active versus passive head movements	16
MCCREA, R.A., GDOWSKI, G., BOYLE, R. AND BELTON, T. Signal processing in the vestibular nuclei during active and passive head movements	18
GALIANA, H.L. Explaining changes in vestibular cell characteristics during active vs passive head movement	19
SUGIUCHI, Y., IZAWA, Y., NA, J. AND SHINODA, Y. Last-order premotor neurons terminating on horizontal ocular motoneurons	20
IZAWA, Y., SUGIUCHI, Y. AND SHINODA, Y. Neural organization from the superior colliculus to horizontal ocular motoneurons	21
KELLER, E. Activity in collicular buildup neurons during interrupted saccades	22
LING, L., PHILLIPS, J.O. AND FUCHS, A.F. Abducens neuron activity during head-unrestrained gaze shifts: Unexpected associations between firing and gaze, not eye	23

## II. HIGH FUNCTIONS

ROUSIÉ, D., BAUDRILLARD, J.C., HACHE, J.C., PELLERIN, P., VAN TICHELEN, P. AND BERTHOZ, A. Ocular tilt, postural asymmetry, vestibulo-ocular disorders, and perceptual deficits related to asymmetries in vestibular organs orientation	24
VAN GISBERGEN, J.A.M. AND VAN BEUZEKOM, A.D. Characterisation of systematic and random errors in roll-tilt estimates obtained with three different paradigms	25
BRANDT, T., BARTENSTEIN, P., JANEK, A. AND DIETERICH, M. Reciprocal inhibitory visual-vestibular interaction: Visual motion stimulation deactivates the parieto-insular vestibular cortex	26
BRONSTEIN, A.M., CASSIDY, L., GRUNFELD, E., OKADA, T. AND SHALLO-HOFFMANN, J. Perception of angular velocity in normal subjects and patients with excessive or reduced eye movements	27
DIETERICH, M., BUCHER, S.F., WIESMANN, M., WEISS, A., ZINK, R., YOUSRY, T.A. AND BRANDT, T. Galvanic stimulation at mastoid level activates cortical vestibular, auditory, and nociceptive areas (a fMRI study)	28
LOBEL, E., KLEINE, J.F., LEROY-WILLIG, A., LE BIHAN, D., GRÜSSER, O.-J. AND BERTHOZ, A. Functional MRI of galvanic vestibular stimulation	28
HARRIS, L., JENKIN, M. AND ZIKOVITZ, D. Vestibular capture of self motion	29

GOLDBERG, M.E., ZIVOTOFSKY, A.Z. AND POWELL, K.D. Parietal receptive field shifts evoked by slow eye and head movements	30
GRAF, W., BREMMER, F., KLAM, F., BEN HAMED, S. AND DUHAMEL, J.-R. Visual-vestibular interaction in primate parietal cortex	31
HEIDE, W., BINKOFSKI, F., NITSCHKE, M.F., SEITZ, R.J., POSSE, S., KÖMPF, D. AND FREUND, H.-J. Cortical and cerebellar control of sequences of memory-guided saccades: The role of efference copy	32
MELVILL JONES, G., GALIANA, H.L., FLETCHER, W.A., WEBER, W.D. AND BLOCK, E.W. Vestibular - podokinetic interactions in the locomotor control of spatial orientation	33
ISRAËL, I. AND SIEGLER, I. 2D navigation and eye movements	34
MITTELSTAEDT, H. Path integration	35

### *III. VESTIBULO-OCULOMOTOR FUNCTIONS*

COLLEWIJN, H. Early components of the human rotational VOR: Latency and gain	37
FUKUSHIMA, K., SATO, T., FUKUSHIMA, J. AND KURKIN, S. Cross axis VOR induced by pursuit training in monkeys: Further properties of adaptive responses	37
MINOR, L.B. Dynamics of the horizontal VOR evoked by high-frequency, high-acceleration head rotations in squirrel monkeys	38
ÖDKVIST, H.H., LEDIN, T., MÖLLER, C. AND NIKLASSON, M. Responses to different types of rotations	40
STEINMAN, R.M., FOROFONOVA, T.I., EPELBOIM, J., MALINOV, I. AND BOGACZ, S. Effects of cognitive factors on VOR actions under natural conditions	40
GOOSSENS, H.H.L.M., VAN DER STEEN, J., OBERDICK, J., DE ZEEUW, C.I. AND FRENS, M.A. Activity of floccular Purkinje cells in awake, LTD deficient mice (17-PKCI mutants)	41
CULLEN, K.E. AND GUITTON, D. On how inhibitory burst neuron firing frequency codes the dynamics of eye, head and gaze motion in the head-fixed and head-free primate	42
HESS, B.J.M. AND ANGELAKI, D.E. Primary position discriminates between tilt and translation	42

ANGELAKI, D.E., MCHENRY, M.Q., DICKMAN, J.D., NEWLANDS, S.D. AND HESS, B.J.M. Semicircular canal contribution to the inertial detection of linear accelerations	43
YAGI, T., KAMURA, E. AND SITARA, A. 3-D analysis of the eye movements during ovar	44
CURTHOYS, I.S., HALMAGYI, G.M., HASLWANTER, T., BURGESS, A.M., BLACK, R.A. AND TOPPLE, A.N. Human three dimensional eye movements in response to interaural linear acceleration during off center yaw rotation on a centrifuge	44
PENG, G.C.Y., ZEE, D.S. AND MINOR, L.B. Mechanisms of adaptation to unilateral labyrinthine loss	45
HASLWANTER, T. AND MINOR, L. Circular head-shaking: a new way of testing the vertical canals?	46
CREMER, P.D., HALMAGYI, G.M., AW, S.T., CURTHOYS, I.S., MCGARVIE, L.A., TODD, M.J. AND HANNIGAN, I.P. Human 3-D eye movements show that semicircular canal head impulses detect absent function of individual canals	46
FETTER, M., HASLWANTER, T., BORK, M. AND DICHGANS, J. Probing 3-D vestibular responses with alcohol	47
 <i>IV. VESTIBULO-SPINAL FUNCTIONS</i>	
BOYLE, R. Vestibulospinal mechanisms in the squirrel monkey	48
MASSION, J. Do graviceptors control the body orientation and/or the center of mass position?	49
JOHANSSON, R., MAGNUSSON, M., FRANSSON, P.A. AND KARLBERG, M. New techniques in the analysis of posture	49
ALLUM, J.H.J., CARPENTER, M.G. AND HONEGGER, F. Vestibular influences on human postural control in combinations of pitch and roll planes	50
HORAK, F.B. Vestibulospinal control in patients with somatosensory loss	52
FRANSSON, P.-A., MAGNUSSON, M. AND JOHANSSON, R. Attempts to quantify continu- ous adaptation in human postural control	53
MAURER, C., MERGNER, T., KERSTIN, K. AND ROSEMEIER, T. Evidence for a supra- modal vestibulo-somatosensory control of posture	54

SHINODA, Y., SUGIUCHI, Y. AND KAKEI, S. Functional synergies of neck muscles implemented by single vestibulocollic and reticulospinal neurons	55
MANZONI, D., ANDRE, P. AND POMPEIANO, O. Contribution of the cerebellar anterior vermis to the gain and spatiotemporal properties of the vestibulospinal reflex: A behavioral and cellular analysis	56
SCHERBERGER, H., SANDOR, P., SUZUKI, J.I., HESS, B.J.M. AND HENN, V. Characteristics of head movements in monkeys after bilateral semicircular canal plugging	57
COHEN, B., HIRASAKI, E., MOORE, S.T. AND RAPHAN, T. Effects of walking velocity on vertical head and body movements during locomotion	58
GOLDBERG, J. Non-linearity and adaptation in the head-neck system	58
KESHNER, E.A., CHEN, K.J., HAIN, T.C., LI, S. AND PATTIN, C.A. Head stabilization mechanisms are responsive to morphological constraints	59
BARNES, G.R., MARSDEN, J.F. AND BROWN, P. Cerebellar patients can make anticipatory hand and eye movements to track moving targets, but their velocity control is deficient	61

#### V. INTEGRATIVE FUNCTIONS

MARKHAM, C.H. AND DIAMOND, S.G. Evidence from space on the independent control of otolith-generated eye movements	63
LACKNER, J.R. AND DIZIO, P. Impaired adaptation to coriolis force perturbations of reaching movements in individuals without labyrinthine function	64
YOUNG, L.R. AND SCHMIDT, P.B. Tactile cueing model for G-seat use in flight simulation	64
MONEY, K. The vestibular system and motion sickness	65
AOKI, M., HAYNES, T., BURCHILL, P., YATES, B., BRONSTEIN, A., GOLDING, J. AND GREY, M. That sickening lurch: Graviceptive control of blood pressure in man	66
YATES, B.J. Vestibular influences on circulation and respiration: Recent insights	67

#### VI. INVITED LECTURES

WILSON, V.J. Cortical effects on vestibular nucleus neurons	69
---	----

POMPEIANO, O. Changes in the directional property of the vestibulospinal reflex induced by proprioceptive neck signals: A cerebellar mechanism	70
 <i>VII. POSTERS</i>	
AW, S.T., FETTER, M., HASLWANTER, T. AND HEIMBERGER, J. Modulation of the caloric nystagmus in response to different semicircular canal orientations	72
BISDORFF, A.R. AND DEBATISSE, D. Position dependent linear nystagmus in the dark in normals	72
BOS, J.E. AND BLES, W. The key conflict in motion sickness	73
BUCHER, S.F., SEELOS, K.C., BRANDT, T. AND DIETERICH, M. Horizontal or vertical optokinetic stimulation activates visual motion-sensitive, ocular motor, and vestibular cortex areas with right hemispheric dominance : A fMRI study	73
CARPENTER, M.G., ALLUM, J.H.J. AND HONEGGER, F. Direction sensitivity of stretch reflexes and balance corrections for normal subjects in the roll and pitch planes	74
CLARKE, A.H., HAMANN, CH. AND SCHÖNFELD, U. The otolith-ocular response to low frequency linear acceleration	75
ERNST, A., SEIDL, R.O. AND WILHELM, TH. Mild brain injury can disturb the interaction of the vestibular subsystems and change evoked otoacoustic activity in humans	76
FUHRY, L., NEDVIDEK, J., ZACHAROVA, G., HABURCAKOVA, C., BROZEK, G. AND BÜTTNER, U. The effect of otolith and semicircular canal convergence on the VOR during eccentric rotation	76
HELMCHEN, C., RAMBOLD, H., STRAUBE, A. AND BUETTNER, U. Involuntary torsional head oscillations in see-saw nystagmus	77
H LAVACKA, F., LITVINENKOVA, V., SHUPPERT, C. AND HORAK, F.B. The role of vestibular and proprioceptive velocity inputs in human postural control	78
HULLAR, T.E. AND MINOR, L.B. High-frequency dynamics of the horizontal VOR following unilateral labyrinthectomy in the squirrel monkey	79
ISRAËL, I., SIEGLER, I. AND VIAUD-DELMON, I. Orientation and motion information from the vestibular system	79
JÜRGENS, R. AND BECKER, W. Vestibular turning sensation: A comparison of the perceptions of angular velocity and displacement in sitting position and during upright stance	81

- KIMMIG, H., GREENLEE, M.W. AND MERGNER, T. Cortical areas activated by pursuit eye movements: A fMRI study 82
